

Sorting Your Watch List by %R Readings in thinkorswim using the BigTrends Toolkit

1. Go to MarketWatch tab at (top)
2. Go to Quotes sub tab
3. Open the Watchlist you wish to sort
4. Right click anywhere on the top row that starts with "Symbol"
5. Select "Customize..."
6. A new window will open
7. Scroll Down the "Available Items" on left side of window until you find the "Custom #" option
8. Double Click any Custom# option
9. A new window will open
10. In this window, Find the Column Name box in the upper left and name the new column "%R"
11. Next to the name box, set the time frame you want your %R readings based (Daily, Hourly, 30 Minutes, etc.)
12. Now, go to the thinkScript box in this window (Large black area on left side of window)
13. Delete any contents in the thinkScript box and enter:
" round(BTTKPercentR(30)) "
14. Click OK
15. Now, Find the newly made %R in the "Available Items" column in the "Customize Quote" Window
16. Double Click %R
17. %R will now be at the bottom of the Current Set Column on the right side of the window (May have to scroll down to locate it)
18. Locate %R, click it once and it will highlight yellow
19. Now move %R to where you want it to appear on your quote screen by clicking the Move Up or Move Down buttons next to the column
20. Click OK
21. A %R Column is now on your watch list. Click the top of the %R column to sort
